COMENSI

Digital atlases for community engagement

Final multiplier event

10 December 2020

15:00

In December 2020 the **COMENSI** project comes to a closure. **Community Engagement for Social Inclusion** is an EU funded Erasmus+ project aimed at developing more effective methodologies of inclusion and activation of citizens at risk of exclusion. **COMENSI** developed and tested accessible tools and methods for communication, networking and organising to improve the capacity of citizens to engage in projects and social initiatives.

The project developed three main outputs during its duration:

- ↘ a methodological toolkit for the intervention in disadvantaged neighbourhoods;
- ↘ the prototype of a digital Neighbourhood Atlas Platform;
- ↘ the experimentation of the toolset and the atlas in the context of neighbourhood hubs during five citizens labs, and a handbook based on the application of the method at local level.

LONDON
BOROUGH OF ISLINGTON

SAVSKO NASELJE
LJUBLJANA

BERLIN
SÜDLICHE FRIEDRICHSTADT

LISBON
AJUDA

PALERMO
CAPO MONTE DI PIETÀ

On December 10th, during the final Transnational Meeting of the project the results will be presented to an international audience, including the five local atlases realised by the **COMENSI** partners in **Palermo, London, Lisbon, Ljubljana** and **Berlin**. We invited representatives of EU programs and organisations active in the fields of urban regeneration to a panel discussing potential applications of such tools on a wider scale.

Register on **Eventbrite**
